

# SPECIAL ORDER UPHOLSTERY CUSHION OPTIONS

## UNI-BLEND: *Standard*

A hand-crafted cushion with a 1.8 or better density high resilient foam core that is wrapped with a super soft high resilient fiber blend of 90% feathers and 10% down feathers. The cushion is then sewn into a down-proof ticking to prevent migration of the feathers through the fabric. Back cushions are constructed with multiple compartments to keep fiber, down and feather evenly distributed and securely in place. Tight back and tufted back styles are constructed with a solid layer of foam topped with fiber.

## ULTRA-PLUSH: *Option with additional charge*

Our down alternative, which contains an odor neutralizing system, is a high-density foam that possesses a supportive air technology that is unlike memory foam. This medium foam core that is surrounded by a 2.5 density luxury foam is designed with billions of microscopic air capsules to enhance support while reducing pressure on sensitive areas of the body. Unlike memory foam, this foam is not thermosensitive, therefore remaining plush and comfortable. This cushion foam minimizes motion transfer and offers exceptional performance throughout its lifetime.

## SPRING DOWN: *Option with additional charge*

Our best step-up, hand-crafted cushion. This cushion contains a 1.8 or better density high resilient foam core with 14-gauge springs inside. It is wrapped with a super soft high resilient fiber blend of 90% feathers and 10% down feathers. The cushion is sewn into a non-woven ticking. This cushion is engineered to provide ultimate comfort and long-lasting durability.
